KEYNOTE ADDRESS 主旨演讲

Towards a world in balance - democratizable preventive healthcare
人工智能：赋能科学与可持续发展

Turning Complexity into Knowledge and Action
化繁为知，以知促行

Prof. Ferenc Krausz • Nobel Laureate in Physics 2023; Director, Max Planck Institute of Quantum Optics
2023年诺贝尔物理学奖得主、马克斯·普朗克量子光学研究所所长 费伦茨·克劳斯教授

Artificial intelligence is rapidly expanding our ability to analyse complex systems, identify patterns across vast datasets and accelerate scientific discovery. Among its many impacts, AI holds promise for revolutionizing healthcare. This keynote argues that democratizable preventive healthcare is critical for sustaining a balanced demographic development and – in addition to AI – calls for high-quality longitudinal molecular data. The global initiative Protecting.Health is collecting these data for establishing the world's first universal screening platform for chronic diseases that are responsible for 18 million premature deaths every year, most of them in low-income countries. The perspective illustrates how high-quality data help us gaining deeper insight and taking informed action. It also connects with the emerging ambition of the Nobel Sustainability World Science Academy: combining science, advanced analytics and transparent metrics to strengthen how sustainability impact is understood, measured and communicated.

人工智能正迅速提升人类分析复杂系统、识别海量数据规律及加速科学发现的能力。在其众多影响中，人工智能有望为医疗健康带来革命性变革。本场演讲指出，可普惠的预防医学对于维持人口均衡发展至关重要；除人工智能外，还亟需高质量的纵向分子数据。全球倡议Protecting.Health正在收集此类数据，致力于建立全球首个慢性病普惠筛查平台——慢性病每年导致1800万人过早死亡，其中大多数发生在低收入国家。这一视角展示了高质量数据如何帮助我们获得更深入的洞察并作出科学决策，亦契合诺贝尔可持续发展世界科学院的发展愿景：融合科学、先进分析与透明指标，全面提升对可持续发展成效的理解、衡量与传播能力。

PANEL DIALOGUE I 高端对话一

From Vision to Impact
从愿景到成效

Leadership, Capital and the Implementation of Sustainable Solutions
领导力、资本与可持续解决方案的落地实施

Ms. Wenji Mao (Moderator)
Chairman · Forbes China Artificial Intelligence Technology Enterprise Selection Committee

Mr. Christopher S. Huang
Co-Head of Global Energy Transition and Vice Chairman of Asia Pacific Investment Banking · Morgan Stanley

Prof. Gretchen Daily
Bing Professor of Environmental Science, Stanford University · Faculty Director, Stanford Natural Capital Alliance

Ms. Rong Yu
Head of Market Development, APAC & India · S&P Global Energy – AI & Digital Infrastructure

Mr. Hendrik Rosenthal
Director of Group Sustainability · CLP Holdings Limited

Mr. Francesco La Camera
Director-General · International Renewable Energy Agency (IRENA)

Scientific knowledge and technological innovation are advancing rapidly. The critical challenge is translating them into solutions that can be implemented and scaled. This dialogue brings together leaders from finance, industry, science, technology and international affairs to explore how innovation, capital and leadership can accelerate implementation and measurable impact.
当前，科学知识与技术创新日新月异，关键挑战在于将其转化为可落地、可推广的解决方案。本场对话汇聚金融、产业、科学、技术及国际事务领域的领军人物，共同探讨如何以创新、资本与领导力加快落实进程、取得可衡量的成效。

- **Moving from ambition to implementation**
  从目标愿景走向落地实施
- **Scaling proven technologies and solutions**
  推动成熟技术与解决方案规模化应用
- **Mobilising capital for sustainable investment**
  动员资本投向可持续领域
- **Connecting science, industry and markets**
  打通科学、产业与市场
- **Creating measurable environmental, social and economic value**
  创造可衡量的环境、社会与经济价值

12:20 – 12:30

KEYNOTE ADDRESS 主旨演讲

Special Keynote Address
特别主旨演讲

H.E. Maryam Nawaz Sharif · Chief Minister, Punjab, Pakistan
巴基斯坦旁遮普省首席部长 玛丽亚姆·纳瓦兹·谢里夫阁下

12:30 – 13:50

LUNCH 午餐

Networking Lunch
午餐交流会

An opportunity to connect across science, business, finance, government and civil society.
为科学界、工商界、金融界、政府及社会各界人士搭建交流平台。

AFTERNOON SESSION
下午会议

Innovation, Technology and the Future
创新、科技与未来

KEYNOTE ADDRESS 主旨演讲

The Planetary Economy
面向未来的新经济体系

Aligning Science, Technology, Capital and Prosperity
推动科学、技术、资本与繁荣协同发展

Mrs. Marisa Chearavanont • Special Advisor to the Senior Chairman, Charoen Pokphand (CP) Group, Thailand
泰国正大集团资深董事长特别顾问 Marisa Chearavanont女士

A forward-looking perspective on creating sustainable philanthropy in the age of AI, as technology reshapes how giving is directed, capital is allocated and long-term value is created. The central question is how AI, better scientific knowledge and measurement can help philanthropic capital flow towards initiatives that strengthen rather than erode the conditions for long-term prosperity.
以前瞻视角探讨人工智能时代的可持续慈善：科技正深刻改变公益捐赠的方向、资本配置方式与长期价值创造。核心议题在于，如何借助人工智能及更完善的科学认知与衡量体系，引导慈善资本投向巩固而非削弱长远繁荣根基的领域。

14:15 – 15:00

PANEL DIALOGUE II 高端对话二

AI: From Measurement to Impact
人工智能：从精准衡量到切实影响

Using Intelligence and Technology to Accelerate Sustainability
智能与科技加速可持续发展

Mr. Chuck Ng (Moderator)
Co-founder • Foundation for Science & AI Research (SAIR)

Mr. Jay Chandan
Chairman • Gorilla Technology

Mr. Claudio Trucco
Hong Kong Digital Lead and Asia Buildings + Places Digital Lead • AECOM

Mr. Dario Liguti
Director, Energy, Housing & Land Management Division • UNECE

Mr. Zhennan Yang
Registered Researcher, Department of Cell and Tissue Communication • Graduate School of Medicine, The University of Tokyo

Mr. Patrick Pan (Liang Pan)
Chief Sustainability Expert / Principal Specialist for Sustainable Development • BYD

Artificial intelligence is creating new capabilities not only to develop technologies, but also to understand, measure and communicate sustainability impact. The dialogue explores how AI, advanced data analytics and breakthrough technologies can help society move from fragmented information towards better measurement, better decisions and scalable solutions. The dialogue will also inform the developing work of the Nobel Sustainability World Science Academy on science-based sustainability metrics and public communication.
人工智能不仅为技术研发注入新动能，也为理解、衡量和传播可持续发展成效开辟了新路径。本场对话将探讨人工智能、先进数据分析及突破性技术如何助力社会摆脱信息碎片化，实现更精准的衡量、更科学的决策和可规模化的解决方案。对话成果亦将为诺贝尔可持续发展世界科学院推进科学化可持续发展指标及公众传播工作提供参考。

- **Using AI to understand complex environmental and economic systems**
  运用人工智能认识复杂的环境与经济系统
- **Measuring sustainability impact across climate, energy, water, materials, pollution and biodiversity**
  衡量气候、能源、水资源、材料、污染防治及生物多样性等领域的可持续发展成效
- **AI as an accelerator of scientific discovery and resource efficiency**
  以人工智能加速科学发现、提升资源利用效率
- **Creating transparent and credible sustainability metrics**
  构建透明、可信的可持续发展指标体系
- **Communicating complex sustainability information to decision-makers and the public**
  向决策者和公众有效传递复杂的可持续发展信息
- **Moving from measurement to implementation and measurable impact**
  从衡量走向落实，取得可衡量的成效

The Next Generation
面向下一代

Science, Education and Leadership for a Sustainable Future
科学、教育与领导力共创可持续未来

Dr. Yuhan Zheng (Moderator)
Chair, IEEE Young Professionals CSSC • Co-chair, UNECE YGRES

Ms. Poman Lo
Vice Chairman • Century City International Holdings Limited

Prof. Barry Barish
Nobel Laureate in Physics 2017

Dr. Youssef Nassef
Director • Adaptation Division, UNFCCC

Mr. Abel Zhao
CEO • CSTS

Mr. Francesco La Camera
Director-General • International Renewable Energy Agency (IRENA)

Every generation inherits both the achievements and the consequences of the generation before it. This intergenerational dialogue brings together universities, scientists, young innovators, entrepreneurs, NGOs and business leaders to explore how knowledge, education, innovation and leadership can equip future generations to build lasting prosperity.

每一代人既承继前人的成就，也承担前人留下的影响。本场代际对话汇聚高校、科学家、青年创新者、创业者、非政府组织及企业领袖，探讨如何以知识、教育、创新与领导力助力未来世代创造持久繁荣。

- **Preparing the next generation for systemic challenges**
  帮助下一代应对系统性挑战
- **Connecting universities, science and entrepreneurship**
  推动高校、科研与创业深度融合
- **Education in an age of AI and accelerating technological change**
  人工智能时代及技术加速变革背景下的教育
- **Giving young innovators pathways from ideas to implementation**
  为青年创新者打通从创意到落地的通道
- **Intergenerational responsibility and long-term leadership**
  代际责任与长远领导力
