

Announcement letter

The Sustainability Award 2025

by the Nobel Sustainability Trust Foundation

The Nobel Sustainability Trust Foundation (NST) is pleased to announce the third call for nominations for the Sustainability Award 2025.

The Sustainability Award 2025 will be given in the following categories:

- **Leadership in Implementation**
- **Outstanding Research & Development** (*topics to be announced in January 2025*)

The awards are given annually to individuals, organizations, and companies that make outstanding contributions to sustainability. The winners are presented and receive the award during a symposium organized by the NST.

The Sustainability Award is a key component of the NST activities. In encouraging sustainability-related research and development initiatives as well as the implementation of sustainable solutions, the NST addresses the following topics:

- Climate change with an emphasis on global warming reduction
- Advances in clean and renewable energy technologies and policies
- A pollution-free, life-sustaining environment
- Present and future generations' societal challenges

The Technical University of Munich (TUM) as the Award Coordinating University (ACU) forms, in consultation with the NST, the Award Committee that will evaluate the nominations and select the final winners in the above-mentioned categories. The Institute for Advanced Study of TUM (TUM-IAS) chairs the process and coordinates the work of the Award Committee composed of international scientists and entrepreneurs.

Award endowment:

Minimum cash award for Leadership in Implementation: **300,000 SEK***

Minimum cash award for Outstanding Research & Development for Smart and Sustainable Cities: **500,000 SEK***

* *Swedish krona*

Deadline for submitting nomination proposals to the NST: Monday, 31 March 2025
(12 p.m./noon CEST).

More information regarding the Sustainability Award supported by NST including the nomination guidelines and submission modalities can be found on the NST website: www.nobelsustainabilitytrust.org/the-sustainability-award-2025
